Reinvent OUR SUMMER one challenge at a time!

Age: 6 and older

Number of players: 2 to 6

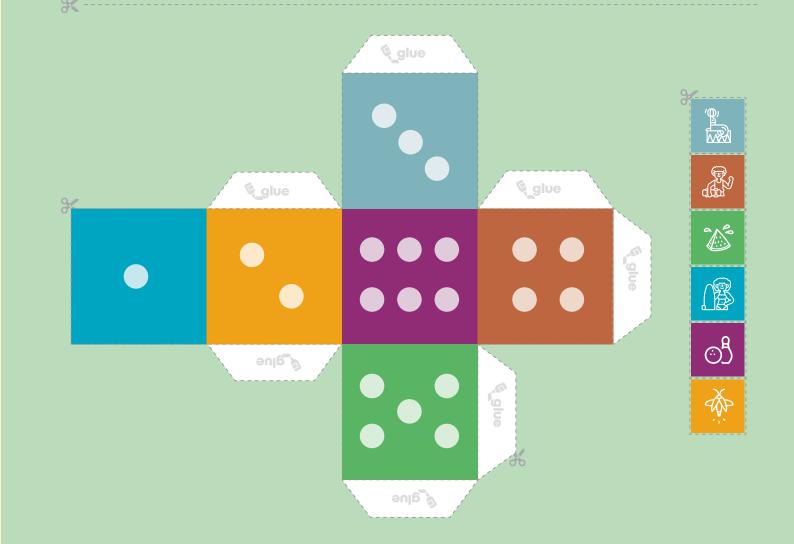

How to win: Be the first to reach square #100

Before you play:

- Place the game board on a table.
- Cut out and choose one token per player.
- Cut out and assemble the die, or use one from another game.
- Place all the colored tokens on square #1.
- Toss the dice: whoever gets the lowest number starts.

How to play:

- In order, each player rolls the die and moves forward that many squares.
- the player must complete the corresponding challenge to "climb" the ladder and get closer to the finish line.
- If a token lands on the head of a snake, that player slides down to the square at the end of that snake's tail.
- The first player who lands directly on square #100

These challenges must be completed **BEFORE** you can climb a ladder

IF YOU LANDED ON:

- 3: Use your body to make the shape of one letter of the alphabet. Can another player guess which one it is?
- 10: Say a word that rhymes with "bunny" (Alternatively : make up a rhyming poem with 3 lines!).
- 17: Unscramble these letters to make a word: KESNA (Alternatively: make your own anagrams!).
- 24: Use your body to make the shape of a number. Can another player guess what it is?
- 31: Read the number on the die and add 3 to it (Alternatively: subtract, multiply, or divide it with other numbers!). What is the result?
- 38: Tell a joke (Alternatively: play a round of charades, propose a riddle, or tell a short story!).
- 45: Do your best robot impression while you recite the alphabet or count from 0 to 10 (Alternatively : say your favorite letters, a word, or even a full sentence!).
- 52: Try to read the following out loud: "She sees cheese" (Alternatively: say it faster and faster).

- 59: Pretend to have a strong emotion. Can another player guess which one it is?
- 66: Try to answer the following silly question: "Do penguins get cold feet? Why?" (Alternatively: come up with another goofy question!).
- 73: Guess how many steps it would take you from where you're sitting to the fridge, and then check if you were right by counting them out (Alternatively: estimate the distance in centimeters or meters).
- 80: Open a nearby book and read the first word you see out loud (Alternatively: make up a proper sentence using that word).
